2025 will mark a pivotal year for the global PV industry. Structural solar growth continues to be fuelled by China and solar's unmatched competitiveness due to its record low prices, unique ...

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

Based on our detailed project pipeline data, our outlook for 2025 installations was roughly in line with 2024. Third quarter installations appear to be validating this. We still anticipate a total of ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Discover all statistics and data on Global solar PV supply chain now on statista !

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

As the PV market grows constantly, reporting of PV installations is becoming more complex. IEA PVPS has decided to count all PV installations, both grid-connected and off-grid, when numbers are ...

The world will almost completely rely on China for the supply of key building blocks for solar panel production through 2025. Based on manufacturing capacity under construction, China's share of ...

The annual growth rate of the photovoltaic market is expected to be around 20% for 2025. However, a more rapid deployment of renewable energy is needed to stay on track for no more than 1.5 °C ...

In the first half of 2025, cells and wafers made up over 40% of China's exports of solar products. Cells account for a bigger share than wafers for the first time. China's solar export market ...
