We are not only a manufactory of EV Charging Stations, but also committed to providing overall operation and charging solutions for electric vehicles, as well as the construction of charging facilities.

It adopts a modular design, compatible with multi-source input and output of mains, photovoltaic, and energy storage, and can be flexibly configured according to scene requirements to provide ...

An indoor photovoltaic energy cabinet is a compact, integrated energy storage system designed to be deployed inside telecom facilities. It combines lithium battery storage, PV input, and intelligent ...

It is suitable for scenarios such as communication base stations, edge computing, and microgrids. Its features include high protection, intelligent BMS/EMS system, diverse input and output interfaces, ...

Products are widely used in solar street lights, base stations, household and commercial solar systems, electric vehicles and other electric transport vehicles. We can also provide customize ...

The 40KWh Indoor Photovoltaic Energy Cabinet provides a reliable and sustainable power solution for telecom base stations, reducing dependency on traditional power grids and lowering operational costs.

The outdoor photovoltaic energy cabinet can provide reliable housing for network servers, edge computers, professional equipment, monitoring systems, photovoltaic, and battery systems.

The Energy Storage Air-Cooled Temperature Control Unit is used to regulate the temperature of energy storage systems in applications such as renewable energy storage, data centers, remote ...

Our energy storage solution is flexible in design and can be seamlessly integrated with various existing base station power systems. The modular design can better adapt to different types of base stations, ...
