Discover how shipping containers are revolutionising the Australian energy industry with modular solutions for battery storage, portable substations, and solar energy systems.

We provide walk-in/non-walk-in energy storage containers, liquid cooling cabinets, marine energy storage containers and various non-standard energy storage products. Meet the requirements of ...

Australia is generally accepted as being a region of low seismicity and low risk, though with a potential for high consequence, with associated design practise and standards tailored to suit.

Earthquake Design Category I (EDC I) Seismic weight at level i - Each of the major axes of the structure shall be considered separately - Vertical earthquake actions and pounding does not ...

At SCS Australia, we design and deliver containerised energy storage systems that provide safe, efficient, and scalable power solutions for industries, businesses, and communities. Housed in ...

In this detailed guide, we explore engineering strategies, innovative design techniques, and modern data analytics approaches to creating robust, earthquake-resistant structures for tanks and containers.

Assembled right here in South Australia Our flagship solar and energy storage solution is the Apex Energy BESS, our state-of-the-art containerised battery energy storage unit.

Our storage systems feature seismic-resistant, moment-resisting reinforcements, offering the strength and flexibility to evenly distribute seismic forces and absorb energy without collapsing.

Learn how to ensure seismic safety for shipping container structures. Discover building codes, earthquake-resistant designs, anchoring methods, and case studies to protect your container home ...
