In 2021, EU4Energy will conduct an IEA In-Depth Peer Review of Belarus' energy sector, analysing energy policy and providing recommendations as the country looks to transition to a more secure, ...

Surpassing even its primary energy supply, Belarus's energy imports (31 Mtoe p.a.) are used to fuel a large, export-oriented refining industry. Due to current sanctions, these exports have been shifted ...

Belarus has approved the Sustainable Energy and Energy Efficiency state program for 2026-2030. The corresponding resolution was signed by Belarusian Prime Minister Aleksandr Turchin.

Information posted on the site is publicly available. When using it, reference to the source is required.

Most energy in Belarus is cheap fossil gas from Russia, and Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus imports oil from Russia, and sends back some refined products such as gasoline.

The ranking positions of Belarus relative to other countries have been determined for an extensive list of economic, energy, innovative and educational indices, as well as for metrics reflecting the state of ...

Belarus energy management

By harnessing its natural resources, Belarus is charting a course towards reduced reliance on energy imports, lower greenhouse-gas emissions and a more resilient heating system ...
