-----  
How has infrastructure changed in Bolivia?

Bolivia has a changing infrastructure. Communication has rapidly adapted to new technology, as exemplified by the continued rapid growth of cellular phone use. At the same time some of the traditional and still used infrastructure has deteriorated, especially the fine railway system in western and central Bolivia whose construction

How much electricity does Bolivia use?

In recent years, Bolivia has made highway construction and maintenance a priority. Bolivia's electric power generating capacity is rated at 787 megawatts. Electricity consumption in 1998 was 2,412 billion kilowatt-hours. The state electric agency, ENDE, was also capitalized and privatized by 3 U.S. consortia in 1997.

How many newspapers are there in Bolivia?

Bolivia has 18 significant newspapers. Currently it is reported that there are approximately 190 radio stations and 60 TV stations. The privatization of the state-owned LAB, ENFE, ENDE, and ENTFL has created much controversy and is an important issue in present-day Bolivian politics.

As a case of study for developing countries, Bolivia's first communications satellite profiles the following telemetry and remote sensing satellite for others industry sectors and indirect benefits as shown before.

Bolivia has a changing infrastructure. Communication has rapidly adapted to new technology, as exemplified by the continued rapid growth of cellular phone use.
