Brazil recently reached the milestone of 3 million distributed solar generation systems installed, solidifying its position as a global leader in the adoption of photovoltaic solar energy.

Despite challenging macroeconomic conditions, increased import tariffs on solar PV modules in 2024, and high curtailment rates, the market has outperformed government forecasts.

In Brazil, solar photovoltaic dominates the distributed generation sector, representing 99% of the country's total distributed generation capacity. Small hydroelectric and wind account for ...

Brazil is projected to reach 40 gigawatts (GW) of distributed solar photovoltaic (PV) capacity by 2025. This growth is being driven by a significant surge in solar installations as ...

This signifies the widespread installation and adoption of distributed PV systems across residential, commercial, industrial, rural, and public buildings in Brazil, benefitting 3.7 million ...

This surge in distributed solar capacity is a direct consequence of Brazil's net metering policies, first introduced in 2012. These policies allow homeowners and businesses to sell excess ...

The adoption of distributed solar has been especially strong among households and businesses. By June 2025, more than 3.7 million renewable distributed generation systems had been installed ...

Unlock Brazil's booming Distributed Generation (GD) market. Learn why standard solar modules fail and how to design a product that wins over local installers.

Photovoltaic (PV) adoption within Brazil's distributed generation (DG) framework has expanded significantly following legislative milestones in 2012, 2015, and 2022, emphasizing the ...
