Can I combine them in series-parallel in any manner with an odd number of panels, say 2 series of 2 and a single 12v or would I need to get a 6th panel?

Login to access and create your next design.

This is very tricky. 3 panels is not really going to work very well for you, maybe OK in good sun, but it's likely that the MPP Voltage of the array will be lower than $V_{bat}+1$ and then you would not be getting ...

Is it ok to have odd number of panels in each group? This would allow me to get at ~100 volts which opens up the market for an all in one. If by odd you mean, 3, 5, 7, etc., yes. If you mean ...

With the AI-powered Design Generation, you can create and edit videos in various themes and styles, such as explainer videos, promotional videos, and short-form videos for social media.

After all, 34% of solar system owners underestimate their panel count during initial inspections, according to a 2024 NREL study. Let's fix that.

You can record your screen (even outside Canva) without switching apps. All screen recordings are automatically converted into a new Canva video design, which you can share or download as an MP4.

By combining Canva's generative tools into one intuitive experience, Canva AI can help generate on-brand designs, write content, and give design advice as you create.
