Should you leave your portable power station plugged in?

Experts recommend keeping batteries between 20-80% for everyday use. However, in emergency-prep mode, maintaining 100% readiness can outweigh long-term cycle optimization--especially if you live in storm-prone areas. Whether or not to leave your portable power station plugged in depends on your lifestyle and scenario. Let's look at common examples.

Should you keep your oupes power station plugged in?

If you live in an area with frequent outages, keeping your station plugged in ensures it's always ready. Models like the OUPES Exodus 1200 or Mega 2 provide reliable standby energy for lights, CPAP machines, or routers when power suddenly cuts out. Many professionals use OUPES power stations as uninterruptible power supplies (UPS).

How long does a power supply hold up?

Any reputable brand power supply should meet the minimum 17 mshold up time. There are some power supplies that will have a longer holdup time. Any reputable brand Uninterruptible Power Supply will have a maximum 8 ms or faster transfer time to battery backup operation. Best answer selected by AutomaticCoding.

How long does a good power supply typically last?

A good power supply can last for many years and has a huge impact on the efficiency of your PC. So, take the time to choose wisely.

Summary: A 220V outdoor power supply's lifespan depends on battery type, usage patterns, and environmental conditions. Lithium-ion models typically last 5-8 years with proper care.
