China has flicked the switch on the world's first dual-tower solar thermal power station, a milestone in renewable energy engineering and showcasing Beijing's growing technological prowess ...

China's solar energy production is reaching simply staggering levels, dragging energy costs down around the globe.

China has commissioned the world's largest open-sea offshore solar power plant, bringing a 1-gigawatt (GW) photovoltaic (PV) installation fully online off the coast of Dongying in ...

During a conference at the Chinese Academy of Sciences, Long Lehao, the chief designer of the Long March rockets and a member of the Chinese Academy of Engineering, revealed that his ...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

The panels are cooled by sea air and receive extra reflected sunlight from the water, they generate 5-15% more power than similar systems on land. China has transformed a vast stretch of ...

Cao Jun, an engineer at Huanghe Hydropower Development Co., Ltd., anticipates that weeds will become a problem for the solar farm, as they could create shade-induced "hot spots," ...

China's solar generating capacity is expected to surpass coal for the first time this year, according to the country's top electricity industry group, marking a milestone in the country's ...

China has unveiled plans for a space power station at an altitude of 36,000 km, where sunlight is constant and 10 times more intense than on Earth. Apparently, it will be collecting energy around the ...
