For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found...

A growing wave of concern has emerged in the United States after American cybersecurity experts discovered hidden cellular communication components embedded in Chinese-made solar ...

Undocumented embedded devices have been found in Chinese inverters and batteries connected to power grids, raising growing concerns among US ...

Undocumented embedded devices have been found in Chinese inverters and batteries connected to power

China s solar-powered communication cabinet inverter grid connection is accelerating

grids, raising growing concerns among US energy security officials.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...
