The BESS supports the solar power facility in Aswan Governorate in Egypt. Officials said the project is Egypt's first utility-scale integrated solar and storage installation.

Egypt hopes to have renewable energy reach 42% of its electricity generation mix by 2030, but officials say the goal will be at risk without more international support.

Egypt's government aims to mobilise more than \$10 billion in private investment for renewable energy, including wind and solar power production, to source 42 percent of the country's...

By 2026, Egypt plans to add 12 gigawatts of renewable energy, focusing on wind and solar power. The government has secured \$3.5 billion in investments for wind projects and is set to ...

H.E. Dr. Rania A. Al-Mashat, Minister of Planning, Economic Development, and International Cooperation, stated that four projects listed under the energy pillar of the "NWFE" ...

This project will expand the Abees Transformer Station's capacity by 450 MW, alleviate energy loads in New Abu Qir City, and stabilize the grid following the shutdown of inefficient power ...

For solar and wind projects, the Egyptian government offers up to a 50 percent discount in corporate taxes for investors up front, as well as cash rebates if installations are productive within a ...

Egypt has revised its targets upward, now aiming to generate 42 percent of electricity from renewable sources by 2030 and over 60 percent by 2040, leveraging wind, hydropower, ...

Investment in EETC's grid infrastructure is urgently needed in response to growth in the peak load for electricity and to successfully integrate Egypt's ambitious renewable energy initiatives ...

Egypt subsidizes solar power generation to the grid

With few clouds, vast empty deserts and a well-developed electricity grid, Egypt has all the elements for a huge expansion in solar power generation. But it is only now moving to exploit...
