Based on projections from Benchmark Mineral Intelligence, here's how the top lithium-ion battery-producing nations will stack up by 2030: China's dominance is staggering: It alone will supply ...

This comprehensive analysis ranks the top 10 BESS manufacturers based on production capacity, global market presence, technological advancements, and notable project implementations.

In 2024, CATL secured the top position of companies by battery (power and energy storage) installed capacity in the global market in 2024, with an impressive 491 GWh, representing a 29% year-over ...

This infographic ranks countries by their share of current production capacity for four types of next-gen batteries. These include solid-state, sodium-ion, redox-flow, other lithium-metal ...

That way, readers can understand why a country ranks high: because it hosts capacity, because it owns capacity abroad, or because a flagship site dominates a region.

According to Rho Motion's BESS database as of February 2025, by 2027 the top 20 countries' deployed BESS grid capacity will have grown by at least 289% compared to 2024.

Among the top 10 global battery manufacturers (power + energy storage) in 2024, six are Chinese companies: CATL, BYD, EVE Energy, CALB, Gotion High-Tech, and Sunwoda.

We present the largest, most influential battery manufacturers, exploring their market positions & strategies that have enabled them to dominate the industry.

Lithium-ion battery manufacturing capacity, 2022-2030 - Chart and data by the International Energy Agency.

Australia is currently the largest lithium producer in the world. However, the largest lithium reserves, around 9

Energy storage lithium battery production capacity ranking list

million tons, are located in Chile. These are not yet being accessed as they could be, so ...
