Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

According to the latest data, prices for PV modules in Europe remained steady across all segments in October 2025. This stability is a stark contrast to previous months, which saw significant ...

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low ...

A rebound for capture prices for wind and some solar assessments as well as lower PPA breakeven price estimates, may revive Europe's flagging PPA market after activity declined in 2025, ...

Solar PPA prices dropped for the third straight quarter on LevelTen's Market-Averaged Continental Index, posting a 1% decline. Year-over-year, European P25 solar PPA prices have
 ...

Explore the latest developments in the European photovoltaic market, including electricity price fluctuations, seasonal changes in renewable energy output, and their impact on pricing. ...

Summary: This analysis explores the current photovoltaic panel price trends in Europe, examining market drivers like raw material costs and policy changes. Discover regional price variations, future ...

Due to limited data availability, we use the Global Price Index series reported by IRENA, based on pvXchange benchmark prices for modules sold in Europe. Historical prices have been ...

Monofacial PERC and TOPCon modules saw consistent prices in Europe in November. Image: SolarPower Europe. The average price of several types of solar PV modules remained stable ...

European market price of photovoltaic panels

In May 2025, shifting market dynamics saw solar module prices continue to rise, with supply constraints and firm demand putting upward pressure on pricing. In contrast, inverters trended ...
