-----  
Which EV charging level should I use?

Level 1 is accessible, Level 2 is practical, and Level 3 is powerful. Understanding how each works will help you make smart decisions about how and where to charge your EV. Most drivers use Level 1 or 2 for daily charging and rely on fast chargers only when they need to travel longer distances.

Are all EV chargers the same?

But not all EV chargers are the same. In fact, there are three main levels of charging, each offering different speeds, equipment needs and use cases. This guide breaks down Level 1, Level 2, and DC Fast Charging (often referred to as Level 3), helping you understand what they are, how long they take, and when to use each one.

How do I choose the right EV charging solution?

Here's how to match your situation to the right charging solution: Choosing the right level helps make your EV ownership experience smoother, more affordable, and tailored to your lifestyle. Level 1 is accessible, Level 2 is practical, and Level 3 is powerful.
