Does Mingyang smart energy have a V-shaped turbine?

Zhongshan-based Mingyang Smart Energy, a global leader in semi-direct drive technology for offshore wind power, revealed that its upcoming 50-megawatt (MW) floating turbine will feature a twin-head, V-shaped design.

Will Mingyang's OceanX revolutionize deep-water wind power?

Mingyang's OceanX, the world's largest single capacity floating wind platform launched from Guangzhou in 2024. Mingyang Smart Energy /LinkedIn China's largest private wind turbine manufacturer has just announced plans to develop the world's largest floating offshore wind turbine, which could redefine the future of deep-water wind power.

Is Mingyang smart energy expanding offshore?

Mingyang Smart Energy's offshore expansion isn't just limited to Asia. The firm recently announced a USD 1.8 billion investment in a new manufacturing facility in Scotland to serve the UK and European floating wind markets.

Will China's new offshore wind project create jobs for former Oil & Gas Workers?

The groundbreaking project, which is expected to create jobs for former oil and gas workers, shows how China's wind energy giants are increasingly competing globally. The country remains a leading force in the global offshore wind industry.

Henan Xihua Fengyang wind farm is an operating wind farm in Honghua, Xihua, Zhoukou, Henan, China.

China's largest private wind turbine manufacturer has just announced plans to develop the world's largest floating offshore wind turbine, which could redefine the future of deep-water wind...
