Goldwind is dedicated to furthering the most advanced and cost-efficient wind power projects, continually raising the bar through a steadfast commitment to innovation.

Based on Goldwind's big data analysis of tens of thousands of installed direct-drive turbines and more than 20 years of wind energy expertise, Goldwind has partnered with DNV-GL and ECN ...

Our smart wind turbine series products are adapted to multiple usage scenarios with excellent wind power generation performance.

Goldwind delivers comprehensive renewable energy solutions to the Australian and New Zealand markets, including investment, planning, design, construction, operational, and maintenance services ...

Goldwind Americas, the Chicago-based subsidiary of Xinjiang Goldwind Science & Technology Co., continues to rack up milestones associated with the U.S. wind industry...

Goldwind Americas offers a comprehensive turnkey menu of services and wind farm solutions, bringing exceptional quality, technical expertise and customer support to power and sustain your projects.

As a world-top wind energy company, Goldwind has extensive experience in wind farm planning. We provide integrated digital solutions for onshore and offshore wind power projects to countries and ...

Cost savings over the life of wind power asset. Our turbines offer lower lifetime maintenance costs and shorter planned service cycles than traditional doubly-fed induction generator (DFIG) configurations.

Goldwind 1.5MW wind turbines feature a smaller external diameter compared to wound rotor designs. The combination of a PMG and direct-drive technology results in lowest-in-class top head mass and ...

Goldwind free installation of wind power generation

Goldwind has completed China's first crane-free replacement of main wind turbine components using its self-developed Self-lifting Smart Equipment. The system enabled high-altitude ...

With over 100 GW of installed wind power capacity worldwide and approximately 48,000 wind turbine units running in 38 countries on six continents, Goldwind has been leading the world with customized ...

The GW5S turbine - featuring rated capacities of 5.2 and 5.6 MW and a rotor diameter of 165 meters - is a direct evolution of Goldwind's portfolio of wind turbine generators that offer best ...
