Hengtong Group announced today, on January 7, 2025, that this development marks the launch of "China's first" PV project aimed at ecological remediation of tidal flats. The project ...

Its capacity is even more impressive: generating over 6 billion ...

The plant, equipped with a domestically developed high-power electrolysis cell, marks a key step in enabling flexible, scalable hydrogen production integrated with fluctuating renewable energy.

Tower-type solar power generation technology has high solar energy conversion rate and great room for improvement in power generation efficiency, so it is widely used in power stations.

Guangdong Qingyuan Yingde Hanguang solar farm is a solar photovoltaic (PV) farm in pre-construction in Hanguang Town, Yingde City, Qingyuan, Guangdong, China.

Once fully operational in 2025, the project is expected to generate an average of 468 million kilowatt-hours of electricity annually, equivalent to saving approximately 151,000 tonnes of ...

Its capacity is even more impressive: generating over 6 billion kilowatt hours annually, it could power Los Angeles for a year, or even an entire country. Both Luxembourg and Papua New ...

"China's largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been connected to the grid ...

How many solar power plants will be built in Syria?The agreement involves building four combined-cycle gas turbine power plants with a total capacity of 4,000 megawatts, plus a 1,000-MW solar power ...

The world's first "dual-tower solo generator" solar thermal energy storage power station in northwest China's Gansu Province entered the commissioning phase on July 15, aiming for operation ...
