Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.

Whether you need a standard solution or a fully customized power module, we deliver packaging that ensures your power system operates safely, efficiently, and on schedule.

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ...

Powerpack Containers are reshaping how industries manage power generation and distribution. With their custom-built, modular design and high-efficiency performance, they provide an ...

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% ...

Interport's shipping containers can be fully customized with a wide variety of modification options, depending on your power generation source and battery storage needs.

our eco° GEN-C series features all-in-one packaged power generation solution, engineered for mobility, easy deployment and scalability. each power container is engineered to meet specific application ...

The LZY-MS3 Bolt-On Solar array Container is an innovative modular photovoltaic (PV) power generation system whose core components include high-efficiency solar panels, storage batteries, ...

Looking to build off-grid power solutions with shipping containers? Boxhub is the leading provider of new

High quality power generation container

and used shipping containers for solar panel installations and battery storage.

Originally launched for limited markets in 2021, the 40-ft ...
