Photovoltaic cells and solar plants often require bolts & nuts of bigger diameters in hot dip galvanised or some special finish. We manufacture bolts & nuts used in this industry from M-27 to M-72 diameter.

Heavy hex bolts, big bolts, hex bolts & nuts in plain, hot dip galvanised conditions are mainly used in photovoltaic cells and solar plants in India and all over the world.

These systems need fasteners that can handle the weight of the panels and withstand outdoor weather conditions like wind and rain. Stainless Steel Bolts and Nuts are the most common ...

Self-tapping hi/lo thread roofing screws are ideal for mounting solar panels for most specifications because they are available in a variety of sizes and dimensions, including #10 and #12 diameters ...

Solar panel mounting nuts and wind turbine fasteners are specialized components designed to secure critical parts of renewable energy systems. Both play a crucial role in maintaining the stability and ...

When it comes to solar panel installations, choosing the right fasteners is essential for ensuring the longevity and efficiency of the system. Specific types of nuts and bolts are required for ...

Because of the size of my panels and the use of six z brackets per panel, that meant I used twelve nylon lock nuts per panel. A dinky 100 watt panel shouldn't need more than four ...

Solar panel mounting systems form the backbone of any solar energy installation. We typically use racking systems that include solar rails, mid and end clamps, and a variety of fasteners ...

The size or dimensions of the solar panels, measured in height by width, will determine the number of solar panels that will fit on your roof and the wattage of solar panels ...

How big are the nuts on the photovoltaic panels

Always use OSHA approved safety equipment procedures when working on a roof. Not responsible for typographical a product of L-Foot Bolt to Clamp (125 in-lbs max)
