This paper presents and discusses a general overview of solar cooling and air-conditioning systems (SCACSS) used for building applications. The popular SCACSS driven by solar ...

Ventilation and heating and cooling in one machine. Performed by an integrated air/air-heat pump. Customer specific solutions for nearly every cooling application, highly integrated design and a great ...

Discover how solar-powered air conditioning systems are transforming Budapest's approach to energy-efficient cooling while reducing carbon footprints.

This research aims to evaluate the feasibility of operating an off-grid solar-powered air-conditioning bed unit using low-GWP refrigerants that can efficiently replace conventional refrigerants.

A comparison among solar thermal SCACSS is performed, taking into account several technical, operational, economic and environmental indicators.

We provide standby duty services cover 24 hours a day, 365 days a year, so our on-duty service colleagues are continuously available for our customers, with modern tools equipped service cars, and ...

Hungary's sunny city of Pecs has become a testing ground for innovative water-solar air conditioning systems. By combining solar energy with water-based cooling, this technology offers a sustainable ...

Hungary is embracing solar air conditioning as a sustainable solution to rising energy costs and climate challenges. This article explores the growth of solar cooling systems, their advantages for residential ...

The paper examines the compatibility of wind and solar energy resources with projections of future electricity demand in Hungary. For such, we model the national electricity system and ...
