AST Networks hybrid communication solutions significantly enhance operational efficiency by mitigating issues such as signal loss and latency. Continuous connectivity allows for ...

By embracing hybrid communications, the maritime sector is not just "catching up" with modern technology but is also poised to set new standards for global connectivity and operational excellence.

The Facilitation Committee, at its forty-seventh session (13 to 17 March 2023), approved the annexed Guidelines for harmonized communication and electronic exchange of operational data for port calls.

Summary: What your Exchange environment needs before you can set up a hybrid deployment. Before you create and configure a hybrid deployment using the Hybrid Configuration ...

Efficient Operations at Ports: PCS streamlines cargo handling processes, reducing waiting times and congestion at ports, leading to faster loading and unloading for carriers, forwarders, and transporters.

"By combining the strengths of various communication systems, hybrid solutions address the unique challenges of maritime operations, enhancing efficiency, safety, compliance, and crew ...
