In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability and renewable ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

Three initiatives, regulations or policies related to decentralised energy storage have been updated or introduced by the relevant agencies at the national or state level.

India's Ministry of New and Renewable Energy (MNRE) and the Solar Energy Corporation of India (SECI) have increasingly shifted their focus -- launching hybrid tenders and ...

To support this, the Ministry of Power introduced measures like funding for battery storage projects, eased transmission policies, and incentives to boost local manufacturing. But the path forward ...

From being heavily dependent on fossil fuels, India is now embracing a future powered by renewable energy, innovation, and policy reforms. The push for solar, wind, and hydrogen energy, alongside ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

India will need 60.63 GW of energy storage by 2029-30, including 18.98 GW from Pumped Storage Projects (PSPs) and 41.65 GW from Battery Energy Storage Systems (BESS), as per a ...
