Ireland has achieved a significant milestone in solar energy development, with its installed capacity reaching an impressive 1.76 GW as of July 1, 2024. According to the International ...

Over 400MW of utility-scale ground mounted solar was added in 2024, taking the total for operational capacity in the Republic of Ireland (ROI) to over 1GW. Ireland continues to see a strong ...

On March 25th, 2025, Ireland reached a new record for grid-scale Solar power, generating over 750 Megawatts (MW) at one point, 18 MW more than the previous peak set in July 2024. This new ...

Statkraft delivered the first energy storage project in Ireland with Fluence in 2020, at its Kilathmoy wind farm and the company has continued to have a strong presence in the Irish energy ...

Since Ireland's first large-scale solar farm was energised in County Meath in 2022, the sector has expanded rapidly. Installed capacity has more than quadrupled -- from 349 MW in 2023 to 885 MW ...

Solar energy is booming in Ireland, with its total installed capacity soaring by 159.8% over the past 2 years. According to the latest Scale of Solar 2025 report from Solar Ireland, the country's ...

How much solar energy does Ireland have? Ireland has achieved a significant milestone in solar energy development, with its installed capacity reaching an impressive 1.76 GW as of July 1, 2024. ...

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar capacity was 1.76 GW at the end of May. Utility-scale ...

Analysis from Cornwall Insight's all-island forward curve suggests that Ireland must achieve a total of 1.7GW of solar capacity at every renewable energy auction until 2030, if it is to ...
