---

As the photovoltaic (PV) industry continues to evolve, advancements in Junpeng Photovoltaic Support Xu Yangbin have become critical to optimizing the utilization of renewable energy sources.

Innovative joint connections were proposed to optimize the structural performance of photovoltaic supports. The results showed that photovoltaic supports designed using Chinese codes ...

A photovoltaic bracket is an essential component of the installation of solar panels. Its role is to support the solar panel and fix it in the correct position to capture solar energy to the maximum extent.

We propose a new design of a binder/carbon-free air electrode with tips-bundled Pt/Co<sub>3</sub>O<sub>4</sub> nanowires grown directly on Ni foam substrate. In this design, the side reactions related to binder/carbon...

Junpeng Liu is currently pursuing the M.S. degree in electrical engineering with the Changsha University of Science and Technology, Changsha, China. His current research interests include renewable ...

This paper introduces a new type of photovoltaic bracket pile foundation named the 'serpentine pile foundation'; based on the principle of biomimicry. Utilizing experimental ...

The invention relates to the field of photovoltaic supports, in particular to a tracking type flexible photovoltaic support.

Based on the simplified bracket model, this article adopts the response surface method to lightweight design the main beam structure of the bracket, and analyzes and compares the bracket models ...

Evaluation framework for paper 'VisualWebBench: How Far Have Multimodal LLMs Evolved in Web Page Understanding and Grounding?'; Ph.D. student at The Chinese University of Hong Kong ...
