-----

The BESS project will reduce the impact of intermittency on the grid and store power for use during peak hours. KenGen is working with the World Bank to fast-track implementation of the project with the ...

This is our outdoor energy storage battery cabinet project in Kenya. This project consists of a total of 24 integrated industrial and commercial energy storage battery cabinets.

Developing a strong battery reuse and recycling industry can significantly reduce raw material demand, lessen environmental impacts, and create new domestic opportunities. This report delves into the ...

Located in a remote village in northern Kenya, this project aims to address the issue of unstable electricity supply. Due to limited grid coverage, power outages have disrupted daily life and ...

KenGen has commissioned its first Battery Energy Storage System (BESS) in Nairobi to power its modular data center, ensuring uninterrupted renewable energy supply.

This project is located in the Nairobi region of Kenya and is designed to power single-family homes. Due to the low grid coverage in Kenya, many households frequently experience power outages.

Kaduna Electric has signed an agreement to develop a 100 MW solar project with battery storage to strengthen electricity supply across Kaduna, Sokoto, Zamfara and Kebbi states in northern Nigeria. [pdf]

According to a report by ESI Africa, KenGen is considering a pilot installation of BESS capacity across several key regions, including the Central Rift, Coastal Region, Mount Kenya, ...

"By efficiently storing surplus energy and enhancing electricity stability and reliability, the BESS project will not only alleviate energy curtailment but also usher in a new era of sustainability ...
