Authorities have yet to decide on whether to use blue hydrogen, which is natural gas-based hydrogen production with carbon capture and storage, or green hydrogen, which is produced ...

Thailand's Energy Regulatory Commission has approved a Feed-in-tariff (FIT) scheme for renewable energy, which carries the inclusion of utility-scale solar, battery energy storage, wind, and biogas.

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

There are plans to increase storage capacity, but it may not be enough for the Kingdom to complete a successful clean energy transition. Asian Insiders' partner in Thailand, Axel Blom, takes ...

Power Grid Corporation of India has won a 2,000 MWh battery energy storage project in Andhra Pradesh under tariff-based competitive bidding. The BOO project, backed by viability gap ...

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...

The city's new hybrid energy storage project bidding initiative combines solar power, battery storage, and smart grid technologies - a blueprint for urban energy transformation. Let's explore what this ...

"Our report shows Thailand can prioritize deployment of renewables and energy storage to meet growing electricity demand," said Ponglert Chanthorn, BNEF's Thailand and Singapore lead ...
