Are lithium-ion battery prices falling?

According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey, lithium-ion battery pack prices have fallen 8% since 2024, reaching a record low of \$108 per kilowatt-hour.

Why did lithium-ion battery prices hit a record low in 2025?

Lithium-ion battery prices hit record low \$108/kWh in 2025, driven by manufacturing overcapacity and chemistry advances.

Will lithium-ion battery prices continue to decline in 2026?

Global lithium-ion battery prices will continue their decline in 2026, though at a slower pace of 3%, reaching \$105 per kilowatt-hour. According to the latest survey from research firm BloombergNEF (BNEF), this trend extends a price reduction trajectory of over 93% since 2010, although the pace of decline has noticeably decelerated.

Should you invest in lithium-ion batteries?

As lithium-ion battery prices reach historic lows, understanding which companies are positioned to benefit from this transformation becomes essential for both short-term traders and long-term investors seeking exposure to the evolving energy storage market.

Lithium-ion battery prices dropped again in 2025, with average prices coming down 8% to \$108 per kilowatt-hour, according to BloombergNEF's annual price survey. China's lead in low ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

Global average prices for battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to continue.

Battery prices are forecast to drop next year due to a glut of manufacturing capacity in China, increased competition and a shift to lower-cost technology. The average price for a battery...

Lithium battery energy storage system prices fall to

Lithium-ion battery pack prices fell 20% in 2024 to \$115/kWh. Discover what this means for EVs, battery energy storage systems, and commercial & industrial energy storage.

According to BloombergNEF's annual survey, battery prices in 2025 remained at \$108 per kilowatt-hour, an eight percent decrease. Experts also anticipate further price declines next year, ...

Battery pack prices for stationary storage applications reached \$70/kWh in 2025, representing a dramatic 45% year-over-year reduction. This segment experienced the steepest ...

While the pace of decline is slowing, the downward trend in battery costs will continue, driven by manufacturing overcapacity, LFP technology adoption, and ongoing technological ...

BloombergNEF finds 2025 lithium-ion battery pack prices dropped to \$108/kWh amid LFP shifts and overcapacity; China saw the steepest declines.

Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.
