-----

Until now, Russia had relied on lithium imports from Chile. Rosatom plans to complete the production cycle with the help of two new "gigafactories," one in the town of Neman in the Kaliningrad Region ...

President Vladimir Putin said last month that Russia should speed up its plans to mine lithium deposits. Demand for lithium has surged in recent years as Russian companies work on the ...

This is the only large-scale industrial production of full-cycle lithium-ion batteries in the country, from primary chemistry for the battery cell to the creation of final modules and complete ...

Russia is rapidly building gigafactories for lithium-ion battery production -- projects that rival the world's biggest players. From New Moscow to Neman, these plants will produce up to 8...

The two identical gigafactories, including the one currently under construction in the Moscow region, will supply manufacturers of cars, buses, ships, and urban infrastructure, and will be ...

Three large factories for the production of lithium-ion batteries are being built in Russia. This was announced at the V Congress of Young Scientists in "Sirius"; by the Head of the ...

The announcement, made by the Russian Ministry of Natural Resources, signals a strategic shift towards reducing reliance on lithium imports and bolstering the nation's burgeoning ...

The mission of Skoltech Energy is to deliver ground-breaking advances in energy-related spheres, such as storage and conversion, production, transmission, distribution and consumption, ...

With strong production capacity and excellent product quality, the company quickly emerged in the industry and became a leader in the field of lithium-ion rechargeable batteries.

Russia's breakthrough in lithium extraction technology is more than just a scientific achievement--it is a

# Moscow lithium-ion battery technology

strategic move with far-reaching economic and geopolitical consequences.
