In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy ...

North America remains the core engine of global energy storage growth. In 2024, the newly installed energy storage capacity reached 37.1 GWh, almost doubling compared to 2023, and ...

Unprecedented load growth across major North American markets is making energy storage increasingly critical to meet projected demand with renewable generation.

From Windsor to Denver and beyond, a new wave of battery breakthroughs show energy storage systems making headway in North America.

The North American energy storage market has experienced explosive growth in recent years, with the United States driving this surge as the region's primary market.

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

Discover the top EV battery manufacturing and energy storage projects currently underway or slated for construction in North America. Read now!

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and soaring ...

North America's energy storage industry is rapidly evolving, with solar and battery storage solutions becoming a central pillar in the continent's shift toward renewable energy systems.

Intersolar & Energy Storage North America's most-read stories of 2025 offers a glimpse into where industry

New energy storage in north america

attention and momentum converged across solar, storage, manufacturing, and ...
