In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability and renewable ...

SBICAPS said in a new report that India will add 30 GW of energy storage capacity - including battery and pumped storage - through standalone and FDRE projects by June 2027.

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

India's Battery Energy Storage Systems (BESS) sector witnessed notable developments in July 2025, marked by key policy advancements, project awards, and the release of new tenders.

India has a very large potential for Pumped Storage Projects (PSPs) across both on-river and off-river schemes. At present, India's pumped storage potential is estimated at around 267 GW, ...

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation ...

An IESA statement on the study stated that India's energy storage sector is poised for a transformative breakout in 2026, with battery energy storage capacity addition set to surge nearly 10 ...

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

Record-low bids to build battery energy storage systems in India have sparked fears that some projects could

New energy storage project in India

be economically unviable and even pose safety risks, industry experts and...
