High quality and long service life: The hydraulic dampers of the SOL family can be used to provide support for minimizing the negative effects of weather anomalies (i.e. vortex shedding, wind ...

In March 2025, the solar industry faces a reckoning. With 42% of utility-scale solar farms reporting bracket-related maintenance issues within their first 5 years, damper testing has shifted ...

Dampers are the ideal solution to this challenge. For example, the GF Damper (produced by Good Future) is a highly efficient solar damper designed specifically for solar tracking systems. It ...

As an experienced hydraulic damper manufacturer, NOLANSE offers hydraulic dampers specifically designed for photovoltaic brackets, incorporating a range of features and advantages that ...

With a strong R& D team and patented technologies, we offer one-stop solutions, including solar tracker controllers, bearings, and dampers, ensuring superior performance and reliability.

In the evolving landscape of renewable energy, the efficiency and longevity of solar power systems are paramount. A critical yet often overlooked component in solar tracker systems is the hydraulic solar ...

Stabilus offers even more than just damping technology - now also available is a smart solution for monitoring the dampers" operating cycles. This avoids long downtimes for testing.

These drop-in replacements offer the same great quality as original equipment (OE) dampers, with the same sizes and specifications. The SOL-28 series is designed to protect against ...

Designed to mitigate wind and seismic vibrations, this damper is a hydraulic feed rate control device that adjusts internal cylinder movement across low to high speeds, safeguarding your PV system against ...
