-----

Piller offers a kinetic energy storage option which gives the designer the chance to save space and maximise power density per unit. With a POWERBRIDGE(TM), stored energy levels are certain and ...

In an era where renewable energy adoption surges globally, Piller Flywheel technology emerges as a game-changer.

In 2016 Piller acquired Active Power, the Texas-based flywheel UPS specialist.

A vertically mounted flywheel and generator utilising magnetic bearing technology, the POWERBRIDGE(TM) is available in a number of sizes for different power ratings and ride-through ...

Our CLEANSOURCE™ flywheel technology embodies elegance, efficiency, and cost-effectiveness, allowing us to pioneer innovative uninterruptible power supply solutions.

The Piller Critical Power Module (CPM) topology is designed to deliver optimum performance combined with all of the operational features demanded by the modern data centre.

As a European market leader in high-power UPS systems, Piller Power Systems has many years of experience in the manufacture of power-conditioning systems and flywheel storage devices, a ...

Some of Piller's UPS systems for short-term bridging use kinetic energy storage options with flywheels to ensure a stable power supply. This concept is both ecological and efficient - and is ...
