What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

Why should Poland invest in energy storage facilities?

Investments in energy storage facilities are key to Poland's energy transition. They increase the flexibility of the energy system and promote the integration of renewable energy sources into the grid.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR 1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

How can Poland improve its energy mix in 2025?

Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO₂ emissions by 15 million tons per year. Adaptation of the electricity grid to the growing number of energy storage facilities. Training in new energy storage technologies.

Poland's updated energy storage regulation raises permit-free thresholds and streamlines approval for small-scale battery systems, supporting wider market adoption.

When BYD Energy Storage and Portugal's Greenvolt Group inked Poland's largest-ever energy storage cabinet project in March 2025, they weren't just signing papers - they were solving a real-world ...

GSL ENERGY has successfully deployed a GSL-BESS50K100 50kW/100kWh air-cooled all-in-one energy storage system in Poland to help industrial parks realize peak shaving and green energy ...

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment ...

Poland integrated energy storage cabinet 50kW agreement

Recently, GSL ENERGY successfully delivered a 50kW/100kWh air-cooled energy storage integrated system project in Poland, paired with Deye 50kW inverters, with a total of 2 units ...

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to ...

GSL ENERGY has recently successfully deployed and commissioned an 80kWh integrated BESS (Business Energy Storage System) with a 50kVA Deye inverter in an industrial park ...

This scheme opens up a real opportunity for developers and investors in Poland's energy storage market. The generous subsidy rates, particularly for small and medium-sized ...

The transmission and distribution network operators in our country have 12 power storage facilities with a capacity of at least 50 kW in their registers. The regulator has issued five decisions recognising ...
