Nanyang Technological University, Singapore (NTU Singapore), Surbana Jurong (SJ), and ENGIE will be collaborating to develop an alternative way of storing energy using liquid air.

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.

Preserving the balance of Changi's ecosystem and beyond. Changi Airport Group (CAG) has partnered with Keppel Ltd. to develop a major solar photovoltaic (PV) system across the rooftops ...

SINGAPORE - Changi Airport is taking its decarbonisation efforts up a notch and has started work on the installation of a large-scale solar photovoltaic (PV) system on the roofs of ...

Therefore, this work highlights that LAES is a competitive and efficient energy storage option for polygeneration plants, particularly when combined with a liquid hydrogen regasification ...

This large-scale ESS marks the achievement of Singapore's 200MWh energy storage target ahead of time. It will complement our efforts to maximise solar adoption by storing and delivering energy given ...

The analysis is structured to be adaptable to any Singapore New Compressed Air Energy Storage System Market while providing actionable, region-specific insights.

Aster and Aether Fuels partner to develop Singapore's first commercial next-gen SAF plant, driving sustainable aviation and energy innovation

We are particularly impressed by the expertise, openness and innovation-focus of Aster, and other regional partners, such as the Singapore Airlines Group and Sembcorp, with whom we aim ...
