What is CPUC energy storage procurement study V Ancillary services?

Ancillary services in the CPUC Energy Storage Procurement Study provide grid operational flexibility and stabilization for reliable electricity delivery. CAISO ancillary services markets include non-spinning and spinning contingency reserves, and regulation up and down.

What is California's energy storage procurement framework?

California's energy storage ecosystem, built since Assembly Bill 2514 and through 2021, includes a crucial component: the PU's Energy Storage Procurement Framework. This framework motivates the development of both demand and supply in the energy storage marketplace.

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.
