Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Can I use solar energy if I don't have a rooftop system?

Even if you rent your home or don't want to purchase a rooftop system, there are many programs will enable you to still benefit from solar electricity. Below are some of the options available for using solar energy at home; check with local installers and your utility for programs available in your area.

Should I buy a solar energy system with cash or a loan?

Purchasing a solar energy system with cash or a loan is the best option when you want to maximize the financial benefits of installing solar panels, take advantage of tax credits, and increase the market value of your home, and a solarize program is unavailable or impractical.

What happens if you lease a solar energy system?

If you lease a solar energy system, you are able to use the power it produces, but someone else--a third party--owns the PV system equipment. The consumer then pays to lease the equipment. Solar leases often involve limited upfront investment and fixed monthly payments over a set period of time.

Experience dependable, portable power with 4Patriots solar generators--designed for resilience, ease of use, and renewable convenience. Unlike conventional gas generators, these units harness ...
