Jamaica is advancing toward energy self-sufficiency by investing in renewable energy, offering incentives and encouraging public-private partnerships; some of which are outlined below.

With construction slated to begin this year, the solar projects in Clarendon and St. Catherine will help Jamaica lessen its dependence on volatile and carbon-intensive fossil fuels. Once ...

This paper examines the key drivers and challenges influencing Jamaica's energy transition, focusing on the unique circumstances encountered by Small Island Developing States (SIDS) like Jamaica.

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month. The ...

Rooftop solar has grown significantly in Jamaica over the past decade, from less than 1.4 megawatts in 2015 to nearly 65 megawatts in 2023, a significant amount for a small island, experts ...

Jamaica is set to build its largest solar park, an ambitious project that initially targets 92 MW of capacity and combines solar energy generation with integrated energy storage.

More than 20,000 Jamaican homes are expected to be powered by clean, affordable, ...

Jamaica is embracing solar energy as a reliable and sustainable alternative to fossil fuels. Amidst power outages and rising electricity costs, communities are turning to the sun for a ...

Developers Wigton Energy and SunTerra Energy Jamaica are each set to build, own and operate large-scale solar projects in Jamaica after successfully bidding in a 100 MW renewables ...

More than 20,000 Jamaican homes are expected to be powered by clean, affordable, renewable energy to be generated from the US\$61 million solar electricity plant, being built in Content District, Clarendon.

Solar Power Generation in Jamaica

As of 2024, about 18% of Jamaica's electricity comes from renewables, primarily wind, solar, and hydroelectric sources. The Wigton Windfarm in Manchester, the largest in the English ...
