Why do you need steel profiles for solar panels?

Strong properties of steel ensure that solar panels remain safe and stable, even during high wind. With our steel profiles, you can rely on a robust and reliable solution for your solar projects. Whether you need steel profiles for a small solar panel installation or large-scale projects, we have the solution to meet your needs.

Who supports by solar steel?

Supports by Solar Steel is the integrated C&I brand of Gonvarri Solar Steel, dedicated to the design, manufacturing, and supply of quick-mount solutions for all types of solar energy installations. Our focus is on aluminum structures and stainless steel fasteners, including anchors and sealing joints.

Are steel profiles suitable for Carports with solar panels?

Our steel profiles are not only suitable for roof structures, but also provide optimal support for carports with solar panel installations. With our flexible design options, we can provide steel profiles that perfectly fit your carport projects.

Why should you choose a metal structure for solar panels?

As solar panels are becoming more and more popular around the world, more and more businesses are looking to take advantage of them. The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes easy and fast.

When you check Steel Structure for PV Panel acceptance, look at five main standards. These are verticality, wind resistance, grounding resistance, material and code compliance, and ...
