This newly updated version maximizes energy density within a standardized 20HQ container, utilizing an aisleless design to deliver high-yield energy storage with a minimized footprint.

The products are widely used in smart grids, wind and solar power distribution and storage, industrial and commercial energy storage, green transportation, and other fields.

The distinctive feature of this system is the utilization of liquid cooling technology to maintain the temperature of energy storage equipment, thereby enhancing efficiency and performance.

This Immersed Liquid-cooled Energy Storage Container adopts advanced liquid-cooling technology to ensure the battery system operates in an efficient and safe environment.

Liquid Cooling Containerized Energy Storage Features SAFE AND RELIABLE Approved industry certification of Cell pass test by UL/TUV/IEC Multi-level design for fire control

GSL Energy's 1MWh-5MWh Battery Energy Storage System (BESS) in a 20FT container offers a scalable, reliable, and efficient solution for commercial and industrial energy storage.

For every new 5-MWh lithium-iron phosphate (LFP) energy storage container on the market, one thing is certain: a liquid cooling system will be used for temperature control.

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency regulation, ...

The 105kWh Liquid Cooling Lithium Battery Module is engineered for maximum efficiency and reliability.

Solar container lithium battery with liquid-cooled constant temperature battery pack

Its state-of-the-art liquid cooling technology ensures consistent performance even in demanding ...

GSL Energy's 1MWh-5MWh Battery Energy Storage System (BESS) in a 20FT ...

Battery Packs utilize 280Ah Lithium Iron Phosphate (LiFePO₄) battery cells connected in series/parallel. Liquid cooling is integrated into each battery pack and cabinet using a 50% ethylene glycol water ...
