Will Nauru install a solar power plant?

Nauru has embarked on an ambitious project to install a grid-connected solar power plant with a capacity of 6 megawatts (MW) of alternating current. This initiative is part of the Solar Power Development Project, which aims to diversify the energy mix and reduce reliance on diesel.

How does Nauru generate electricity?

Nauru currently relies heavily on imported diesel for power generation, which poses challenges due to fuel price fluctuations and supply interruptions. About 3% of its electricity comes from solar photovoltaic installations. What key renewable energy projects are underway in Nauru?
