How to use the Titan solar generator?

The Titan solar generator has two modes of use: DC ONLY and DC/AC. These two modes can be selected using the power switch. Middle selection is OFF, down is DC ONLY, and up is DC/AC. DC Mode: If you only need DC power for charging cellphones, tablets, lights, etc., you can save power by using the DC ONLY mode.

How do I take the Titan solar generator out of safety mode?

When the battery has been depleted below normal operating levels, the Titan solar generator will go into safety mode. During safety mode, the Titan will not turn on with the power switch. To take it out of safety mode, the battery must be charged. To do this, first turn the Titan solar generator power switch to the OFF position.

How do I store MY Titan solar generator?

Make sure each battery pack is charged to at least 50% capacity and the POWER SWITCH is turned to OFF before storing. Store your Titan solar generator in cool, dry environments and away from any combustible materials or gases. ***FAILURE TO STORE AND MAINTAIN YOUR TITAN SOLAR GENERATOR PROPERLY WILL VOID THE PRODUCT WARRANTY.**

How often should I charge MY Titan solar generator?

The Titan solar generator will retain a charge for up to 5 years. However, for optimal battery life, you should use 10% of the battery once per year. Make sure each battery pack is charged to at least 50% capacity and the POWER SWITCH is turned to OFF before storing.

AC adapter, solar charging cable or car charger. First, you need to determine the input source and select a charger accordingly. Then, connect the charger to the
