Regular switching requirements are more than adequately handled by our proven "Standard" 3 or 4 pole devices, while dedicated designs are available for switching DC loads (PV applications, ...

GF, GAF and GA contactors are specifically designed for switching DC circuits up to 1500 V. Thanks to the efficient breaking of DC circuits, the product range is one of the most compact on the market for ...

LETOP DC Modular Contactors are designed for direct current applications and provide precise and reliable control for solar power, telecommunications, and other DC environments. These contactors ...

GF contactors allow remote and energy efficient switching in DC applications. By bringing contactor switching capabilities to 1500 V DC there are now additional options for PV inverter manufacturers to ...

CU power contactors have been developed for solar power systems. The double pole design ensures all-pole disconnection of the solar panel field and string.

When solar panels generate electricity in the sun, high-voltage DC contactors can respond quickly and accurately connect the output of the panels to the input of the energy storage system.

High voltage DC contactors play a crucial role in solar power systems by ensuring safety, efficiency, and proper current flow. Learn about their benefits, working principles, and top brands.

Durakool High Voltage contactors and relays, capable of handling up to 1000VDC and 1500 Amps safely and reliably, are utilised for solar energy power, switching the outputs from photovoltaic panels.

IMO's DC Contactors are designed for switching DC circuits. Applications requiring DC switching include a wide range of industries including Photovoltaic (PV) systems, rail transportation, power distribution, ...

Find your contactor for photovoltaic applications easily amongst the 46 products from the leading brands

Solar panel DC contactor

(Sensata, BSB, Tianshui 213, ...) on DirectIndustry, the industry specialist for your professional ...
