How much do solar jobs pay a year?

Through our analysis, we found that solar jobs in the system design sector have the highest average median pay, at \$76,378 a year. Jobs that fall under installation and operations have the lowest average median pay, at \$52,101, although that's still 31% higher than the median personal income in the U.S.

Are wind and solar power jobs growing?

Wind and solar electricity output account for a large and growing portion of power generation, with jobs in those sectors making up an increasing share of energy employment. This rapid growth is challenging traditional methods of measuring that workforce.

What are the highest paying solar jobs?

The highest-paying solar job is a lawyer with solar expertise, which can also be called an energy or environmental attorney. They earn a median annual salary of \$114,870, although out of all of the solar jobs, this one does require the highest level of education and training, including a postgraduate degree.

How much does a solar installer make a year?

It's a great option for those looking for solar industry jobs, as there is plenty of room for advancement to other solar installer jobs, such as a certified solar PV installer or a solar crew chief, both of which have a median annual salary of more than \$40,000. What Are the Solar Job Sectors?
