---

Valencia has begun turning its cemeteries into solar farms, prompting anger from relatives of the dead who say they were not consulted over the plan to meet net zero targets.

Valencia, famed for paella and now potentially its eco-conscious ...

Valencia, famed for paella and now potentially its eco-conscious ghosts, has already installed the first batch of photovoltaic panels in three cemeteries. By the time the project is ...

The townsfolk began installing solar panels in the cemetery some time ago and plan to have 1.3 MW of solar output by 2025. This will help supply power to the area's 4,000 residents.

The city of Valencia is placing thousands of solar panels in its cemeteries as part of an ambitious plan to transform them into green energy hubs.

Power (RIP) project, is set to be the largest urban solar farm in Spain, capable of producing around 2.8 MW of electricity. This idea could come in handy for countries where land is scarce to use for solar ...

The 400KW photovoltaic power generation project developed by Gongde Garden of Yuhuatai, Nanjing, using the spare area on the top of the wall burial in the park, has officially started ...

The Spanish city of Valencia plans to use the graveyards as solar power plants. The project has been named RIP (Requiem in Power). It involves installing 7,000 photovoltaic panels ...

Back almost three years ago in July 2021, Funeral Director Daily brought you this story of how a renewable energy company, Verogy, had put a 7,000 panel solar energy farm inside a ...

The panels are being installed on top of crypts and other structures in five public cemeteries across the city,

## Solar power generation was installed next to the ancestral grave

with the goal of creating a total capacity of 2.8 megawatts.

A French town is installing a canopy of solar panels over its cemetery that will distribute energy to local residents. The idea didn't start with solar.
