-----  
Is the gs3000x worth it?

The GS3000x is also incredibly lightweight... which allows someone to wear it for considerably longer than you may think. Yes, the pads are made out of foam, but because of the light clamp, AND the fact that they weigh basically nothing means that you never really notice them... which is a huge plus for someone like me.

How much power does a 3KW Solar System produce?

This 3kW system provides 3,000 wattsof DC direct current power. This could produce an estimated 300 to 750 kilowatt hours (kWh) of alternating current (AC) power per month,assuming at least 5 sun hours per day with the solar array facing South. The actual power generated will vary based on location,equipment and installation factors.

How much space does a 3KW Solar System need?

A 3kW Solar Kit requires up to 184 square feetof space. Ideal output will be achieved with an unobstructed south-facing view of the sun for maximum solar power. This 3kW system provides 3,000 watts of DC direct current power.

Feature-rich and easy to install, the RV Series GS produces up to 3000 watts of continuous, modified sine wave power from a 12-volt battery bank. It is ideal for powering basic appliances and power tools.
