-----

Chinese PV module manufacturer Trina Solar has received the green light from the Victoria government in Australia to build a 500MW/1,000MWh battery energy storage system (BESS).

Chinese battery and energy-storage companies are significantly increasing their footprint in Australia, securing supply agreements totalling nearly ten gigawatt-hours and accelerating the shift of ...

The system will store low-cost renewable energy during the day and feed power back to the grid during peak demand hours. It is estimated that the system will supply enough electricity ...

On October 29, 2025, Nanrui Jibao, a leading enterprise in China's power grid control technology, signed a strategic cooperation agreement with Pacific Green of Australia in Melbourne. ...

Chinese PV giant signs a 5 GWh battery supply deal for a portfolio of storage projects, mostly located in Australia.

Kevin Changbin Qiu, Senior Vice President of HyperStrong International, explains how the company intends to lead not just with energy storage systems, but with integrated storage solutions ...

The EPC project of Templers energy storage offshore in South Australia, contracted by China Energy Engineering Group's Shanxi Electric Power Construction Company commenced on ...

China is leading the charge in the global clean energy race, leaving Australia with a critical choice: engage or fall behind. A strategic reset is needed to align Australia's climate ambitions ...

From outback solar farms to coastal cities, Chinese energy storage expertise is helping rewrite Australia's energy rules. The question isn't whether storage will transform the grid - it's how quickly ...

China's JinkoSolar has submitted plans for a 600MW solar-plus-storage project in Queensland, Australia, to
