System was commissioned yesterday shortly after 1:00pm. It never ended up showing production on the monitoring site (inverter or panel level), even though it was producing around 4kW ...

Turn on the screen by pressing the green button at the bottom of the inverter, or the OK button at the inverter's front. Check your inverter's production information.

Do not attempt to repair the inverter or power optimizers without a SolarEdge-certified installer or electrician. While our systems are in compliance with all safety regulations, handling electrical ...

My solar company called Solar Edge, got it RMA and now I'm getting a new inverter installed today. What I'm not thrilled about is the lack of LCD screen and button up front.

From this year on the new inverters will be introduced into the market. The new series SolarEdge inverters are produced without a display. No more buttons and LCD screen on the front of ...

Without online monitoring it can be a serious PITA depending on where your inverter is. The monitoring will show the output from each panel so you can tell which panels are getting shaded, ...

Installing a SolarEdge system without ensuring compatibility of the module connectors with the optimizer connectors may be unsafe and could cause functionality problems such as ground faults, resulting in ...

As far as I know, it only has wired Ethernet connectivity. When you are provisioning the inverter, you turn on the Wi-Fi, and then use your phone with SetApp to connect to the network that ...

If you want to continue to use the optimizers to their full effect, you will need a SolarEdge inverter to replace it. I would contact SolarEdge directly - not an installer, and tell them to take care of it.

SunCommon has installed several SolarEdge inverter models. From left to right below, they are the SetApp
