A consortium of Asunim Solar and I-kWh has just joined a solar project under development near Juba, the capital of South Sudan. The two companies will work alongside Elsewedy Electric. In December ...

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution. There are plans to build new generation stations and to import electr...

ENERGY STORAGE POWER STATION SOUTH SUDAN. Our certified energy specialists provide round-the-clock monitoring and support for all installed home energy storage systems.

A just-commissioned solar and battery storage system will reduce diesel consumption by at least 80% at a base for 300 humanitarian workers in South Sudan, managed by the UN's International ...

There are plans to build new generation stations and to import electricity from neighboring Ethiopia, Sudan and Uganda, but the civil war has hindered progress in that direction.

Spearheaded by Ezra Construction and Development Group Ltd., this project not only marks a pivotal moment in South Sudan's energy landscape but also represents the country's ...
