-----  
How do I add a Sungrow inverter to isolarcloud?

In the iSolarCloud app, navigate to the device setup section. You can add your Sungrow inverter by scanning the inverter's serial number or QR code. The app will walk you through the process of registering the inverter for online monitoring. Once added, you'll be able to monitor your solar system in real time through the app.

How do I check if my Sungrow inverter is working?

You should see your system online through the iSolarCloud app within a few minutes. Make sure your Wi-Fi router is close enough to the inverter for a strong signal. Sungrow inverters usually connect to 2.4GHz Wi-Fi networks only (not 5GHz). If you run into any issues, try rebooting your inverter and router.

How do I connect Sungrow to isolarcloud?

You will be asked to leave the isolarcloud app and go to your phone or tablet settings to find your WiFi connections. Look for the Sungrow WiFi network (starts with SG-XXXXXX) and connect to it. Once your device is connect to the Sungrow WiFi, return to the iSolarCloud app.

Why do I need to monitor my Sungrow inverter?

Monitoring your system in real-time gives you full control over your solar energy production and helps ensure that your solar investment is operating at peak performance. Occasionally, you may experience difficulties connecting your Sungrow inverter to WiFi or maintaining a stable connection. Here are some common issues and solutions:
