The maximum current calculation has not appreciably changed from the 2017 NEC. It's still somewhat complicated, because the method you must use depends upon the characteristics of your system.

The battery sizing is determined based on the solar PV capacity calculated for each building type. However, when the solar PV capacity is determined by multiplying the solar access roof area (SARA) ...

NEC requires PV currents to be based on module short-circuit current (Isc) &#215; 125%. Conductors then

must be sized at 125% of that current again (because PV circuits are continuous ...

The 125% rule in NEC Article 690 tells you how to compute maximum PV circuit current and then choose conductors and OCPDs that can continuously carry that current without overheating.

The meaning of ALLOW is permit. How to use allow in a sentence.
